

TIM'S ICE MANUFACTURING

ICE INSTALLING AND MAINTENANCE PACKAGES

Contact: Matt Yeo 780-940-3650 or Email

timsicemanufacturing@outlook.com

Package A:

Full installation of your curling ice from the ground up. We will flood till level, paint white, install hacks and dividers, cut and paint circles as well as install any logos you would like. The only thing we require is a clean concrete pad set at 19 degrees Fahrenheit for 3 days prior to our arrival.

Package B:

Installation of your curling ice from a level ice pad. Installation of your curling ice will include: paint white, install hacks and dividers, cut and paint circles as well as install any logos you would like. What we require is a level pad or about 3-4 open hose floods.

Package C:

Installation of a curling from a level ice surface that has been painted white. From there we come in and cut and paint circles, lay hacks, dividers and lines, and will install any logos you require. We require a level ice surface which takes about 3-4 open hose floods, fully painted and sealed white ice surface which requires 1 sealing floods.

Package D:

We offer a full installation of Hack to Hack vinyl curling sheet. We will install all of it. All we require is a cold clean concrete pad set at 19 degrees Fahrenheit for 3 days prior to our arrival.

Yearly Ice Contracting

From start up to removal, our staff will provide ice installation and excellent service and well as tournament quality ice conditions for your curling season.

For any and all inquiries as well as pricing please call or email.

Ice Consultations:

We offer yearly consulting for your club ranging from helping with the install or training your staff to help your club obtain top quality ice conditions for the season.
